

PURE-QI™

Automated Filtration System

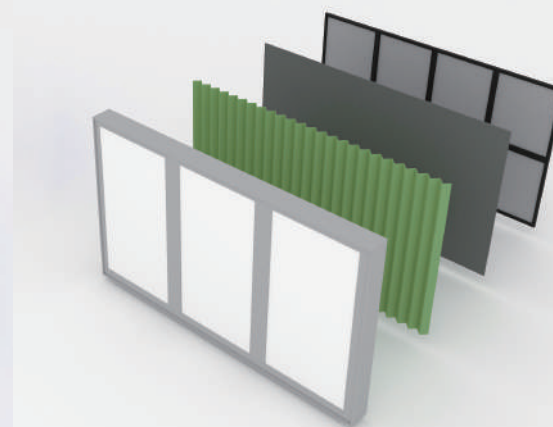

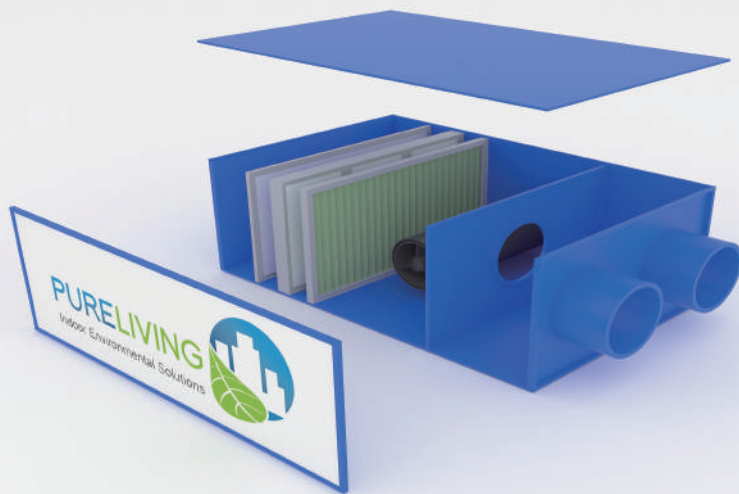

Pure-Qi™ is a unique, high efficiency patented in-ceiling air cleaner with multiple modular functions for tackling various pollutants.

Benefits :

- Performance Guarantee
- True HEPA filtration for PM2.5
- Different filter options to address your pollutant situation
- Ductable for improved coverage and recirculation
- Independent of air-conditioning system for easy relocation and independent operation
- Flexible installation placement to save space
- Available with ECS™ (Eco-Control System) smart filtration automation
- Noise reduction capability
- Filtration and fresh air in the same unit
- Total Care™ maintenance to extend performance

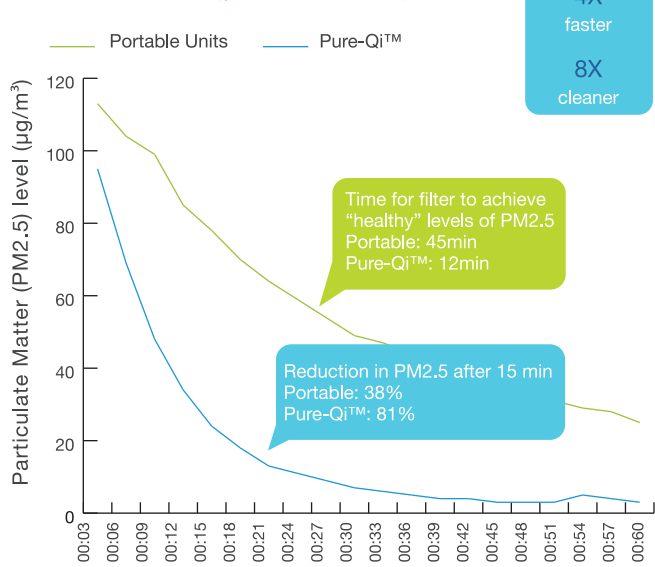

Pure-Qi™ Filtration Layers

Performance

Performance: Pure-Qi™ vs. Portable Units

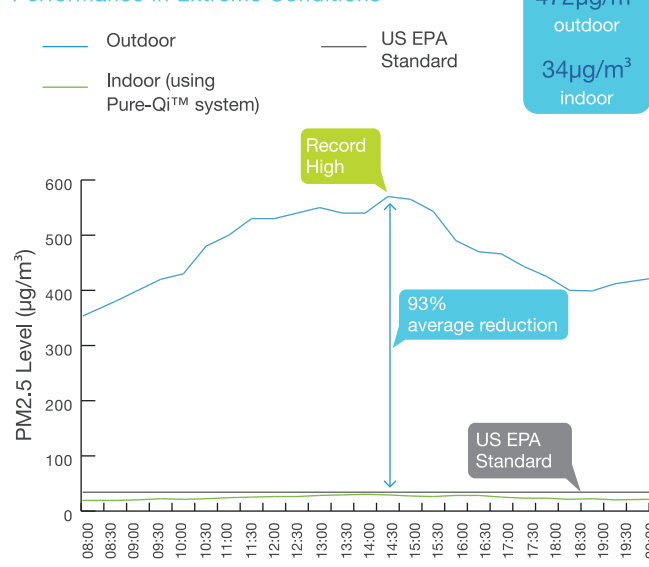

4X faster
8X cleaner

Source: Beijing classroom, outdoor levels of 120µg/m³

Within just 12 minutes, the Pure-Qi™ system is able to meet the US EPA standard of 35µg/m³. After one hour of continuous operation, the Pure-Qi™ system is able to reduce PM2.5 levels in the indoor air to 3µg/m³.

Performance in Extreme Conditions

472µg/m³ outdoor
34µg/m³ indoor

Even in highly-polluted outdoor conditions, Pure-Qi™ continues to achieve filtration results conforming to US EPA standards. Data from December 6, 2013 outdoor levels averaged 472µg/m³, indoor levels averaged 34µg/m³.
